Specification

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: There is no mention in the specification of a 50% level of the block copolymer.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 11-30 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no mention in the specification of a polymer concentration of more than 30% by weight.

Claim Rejections - 35 USC § 103

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

5. Claims 11-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hansen 4,405,680, Grube et al. 5,055,135 or Ohtsuka et al. 5,925,625, in view of Schoenke 4,032,491, Buck et al. 4,530,652, Kalkanoglu 5,437,923, Fensel et al. 6,524,980, Drieskens et al. 6,538,053 or Stephens et al. 2003/0149140.

6. All references have been described already in the previous Office action. The rejections are maintained in view of the “Response to Arguments” below.

Response to Arguments

7. Applicant's arguments filed 5/22/08 have been fully considered but they are not persuasive. Grube et al. disclose between about 2 and about 30 wt. % block copolymer in claims 1 and 3. Hansen teaches about 6 to about 30 percent by weight of block copolymer. “More than 30” and “about 30” overlap. Ohtsuka et al. recite (A-B)_nA type block copolymers in column 5, lines 31-35. The rejections are maintained.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
